

## Fluo 750TX

High molecular weight PTFE for creating strong and consistent texture with matting in powder coatings

### Features and Benefits

- Provides a high level of texture (structure) and gloss control in powder coatings
- Improves abrasion resistance
- Adds lubricity; good sealant adhesion
- Ideal for high temperature applications where heat resistance and non-yellowing are required
- Typically added into the powder coating pre-mix before extrusion
- Conforms to (EU) 2019/1021 & Stockholm Convention (POP)

### Composition

Polytetrafluoroethylene (PTFE)

### Recommended Addition Levels

0.5-1.5% (on total formula weight)

### Systems and Applications

Powder coatings

### Typical Properties\*

	<u>Fluo 750TX</u>
<b>Melting Point °C</b>	>325
<b>Density @ 25 °C (g/cc)</b>	2.20
<b>Maximum Particle Size (µm)</b>	145.00
<b>Mean Particle Size (µm)</b>	20.0 - 30.0
